SUMMARY

UI/UX Designer with 2+ years in a banking product (web and app). Conducted user research, designed the mandatory onboarding flow and built the design system from scratch.

PORTFOLIO

veralevanova.github.io | behance.net/a0dc223b

PROFESSIONAL EXPERIENCE

Fintiba GmbH, Frankfurt, Germany — Jan 2024 – June 2026
UI/UX Designer

- Conducted user interviews with Fintiba customers (mostly international students) and analyzed session recordings to find usability and onboarding issues; built personas from the findings.

- Designed the mandatory onboarding flow for opening a blocked account (web and app): one question per screen, conditional branches for student, sponsor and minor scenarios, FAQ hints. Studied 4 competitors and the PostHog funnel with the product owner; launched in 2024, iterated for two years.

- Designed web and mobile interfaces for the banking product, including money transfers (Standard and Instant) and recurring payments; refined flows and UI with a Senior Designer.

- Built the product's design system from scratch with a Senior Designer's feedback and approval: 150 components, 944 variants, color, spacing and radius tokens, atomic structure, rules for bottom sheets and modals.

- Used AI tools for design exploration and prototyping: Figma Make (design and prototypes), Claude and Lovable (design concepts).

- Worked in two cross-functional teams (Banking and Customer Interface) with a PM, tech lead, developers and QA, in English; joined stand-ups and sprint planning, presented completed tasks at sprint reviews.

- Supported QA in the Banking team: manual testing, test cases, full testing of the app and website.

Graphic Design Courses, Minsk, Belarus — Sep 2023 – Nov 2023

Typography, color theory, composition, visual hierarchy; Adobe Photoshop projects.

EDUCATION

Economist-Manager, Belarus State Economic University — Sep 2011 – May 2027
Economics and Management of Tourism Activities
